

Arley goes electric

“THE last few years have seen an incredible growth in the popularity of electrically powered fires and stoves” says Arrow Fires (a part of Arada), which has now launched an electric version of its popular Arley stove.

Manufactured in steel, the Arley Electric has an output of up to 2kW, is available with a wireless remote control and has a flame effect that can be operated independently of the heater.

The twin-door design has a suggested retail price of £449 inc VAT.
