

# Plug and play display

MALACRINO Mantels has launched a display unit that can be supplied free of charge to any retailer who also takes two separate display fireplaces.

Based on a standard pallet sized base, the two-sided unit will accommodate two fireplaces and appliances and will be supplied and delivered free of charge to participating retailers.

As Frank Malacrino said, "The display unit has been designed for those larger retailers who have floor space to fill. It provides a ready made plug and play facility at no cost and without having to disturb existing displays in a showroom."

Weighing in at 150kg, the display unit requires, for delivery, a minimum door opening of just over a metre (40 inches). Malacrino Mantels is also offering participating retailers full in-house training on its range of products.
