

Wanders Vero range

ACR Heat Products has added the Vero range to its family of Wanders products.

The new range offers three options, the Vero as an insert, the Vero 33 (*below*) as a free standing appliance with a pedestal and a top flue exit and the Verox as a wall hanging appliance again with a top flue exit. These three options are said to provide customers with a great deal of versatility for installation into a wide range of homes.

The Vero range, available for wood burning only with each model having a nominal heat output of 5kW, comes in Anthracite as standard with a Serpentino soapstone side panel option.

For further information please email enquiries@acrheatproducts.co.uk or call 0121 706 8266.
